

# The Range, Reconsidered

Create your aesthetic statement

**GAGGENAU**

## Create your aesthetic statement

The modern kitchen represents the harmonious interplay of cooking, living and entertaining. Gaggenau appliances draw the eye with their shared sculptural forms that encourage multiple configurations without compromising a unified aesthetic.

Designed to be combined, the Vario 400 series cooktops offer a choice of gas, Teppan Yaki, electric grill and induction. The addition of discreet downdraft ventilation enables open-plan living, island cooking and unrestricted views. Inspired by professional kitchens, the ovens, combi-steam ovens and combi-microwave ovens, placed at an easily accessible height, perfectly complement one another functionally and visually.

## The range alternative

Consider a range alternative made up of what you want: gas, induction, Teppan Yaki, electric grill; and below, oven, or combi-microwave oven, vacuuming or warming drawer that can be tailored to create 30, 36, 48, 60 inch, or endless combinations – all with a choice of powerful, stainless steel ventilation to provide exceptional air and cleansing. Now integrate your perfect configuration into your carefully chosen kitchen cabinetry.

## Complete capability, total compatibility

The addition of a combi-microwave oven will make everyday cooking a daily joy, while the addition of a warming drawer will keep things ready when schedules go awry. Ventilate with visor hoods hidden within an overhead cabinet.

48" oven combination. Three 15" Vario 400 series cooktops paired with 400 series 24" oven, combi-microwave, and warming drawer.

48" oven combination. Three 15" Vario 400 series cooktops paired with two 24" 400 series ovens.

60" oven combination. One 36" Vario 400 series gas cooktop combined with one 15" Vario 400 cooktop. Below are two 30" 400 series ovens.

## Unify your vision

Each Gaggenau series of appliances offers a variety of alternatives for any space, be it a wide-open social setting in marble or an enclosure in wood dedicated to cuisine creation.

The combination of oven and cooktop can change the nature of your kitchen significantly. Compare the gas cooktop with solid brass burners and prominent solid stainless steel illuminated controls on the front surface combined with a 36 inch EB 333 oven, versus the sleek, full-surface induction and expansive 30 inch oven.

30" oven combination. One 30" 400 series full-surface induction cooktop combined with a 30" 400 series oven.

36" oven combination. One 36" Vario 400 series gas cooktop paired with a 36" EB oven.

30" oven combination. One 36" 200 series gas cooktop combined with a 30" 400 series oven. Ventilation: 36" 200 series visor hood.

## The range, reconsidered

Configure the range alternative you desire. Double 36 inch EB 333 ovens and 400 series Vario cooktops, integrated with downdraft ventilation, why not? The downdraft replaces the potentially overbearing hood and efficiently clears the air with minimal visual distraction.

A bold statement that promises culinary brilliance and ventilation, without the hood.

48" oven combination. A 30" Vario 400 series full-surface induction cooktop paired with a 15" Vario 400 series cooktop. 24" oven, combi-microwave, and warming drawer. Ventilation: 47" 400 series retractable downdraft. Undercounter combi-microwave installation not approved in Canada.

## Island life

Island cooking in an open-plan space presents an alternative to the traditional range and hood placement against a wall. Entertain family and friends with a clear view of the sunset, all possible with Gaggenau integrated downdraft ventilation and retractable downdraft ventilation.

Remove vapor, heat and unwanted aromas at the source, without the need for a hood that obscures your vision or drowns out your conversation. The intelligent design of the ducting and blowers allows you to place ovens in the same cabinet as the downdraft ventilation, in essence creating a bespoke range alternative.

36" oven combination. Two 15" Vario 400 series cooktops paired with a 6" Vario 400 downdraft. 36" EB oven below.

36" oven combination. 36" 400 series full-surface induction cooktop paired with a 36" 400 series retractable downdraft. 36" EB oven below.

# Individually accomplished, exceptional together

Design your ideal culinary scenario by seamlessly joining together our modular cooktops and ventilation options. The potential scale of the Vario 400 series cooktops is their most striking feature. The ability to combine all variety and widths of the Vario 400 cooktops offers limitless possibilities. The inspired chef will know no bounds.
