IT'S THE DETAILS  
THAT DEFINE US

We engineer steel to move as if it's weightless. We create features that feel anything but ordinary. We select materials that perform and add a luxurious presence.

At Monogram, it's not just one detail, it's many. When you put them all together, you create appliances that look, feel, and perform as if they were designed perfectly for you.

A STORY IN  
EVERY DETAIL

**Sapphire Glass**

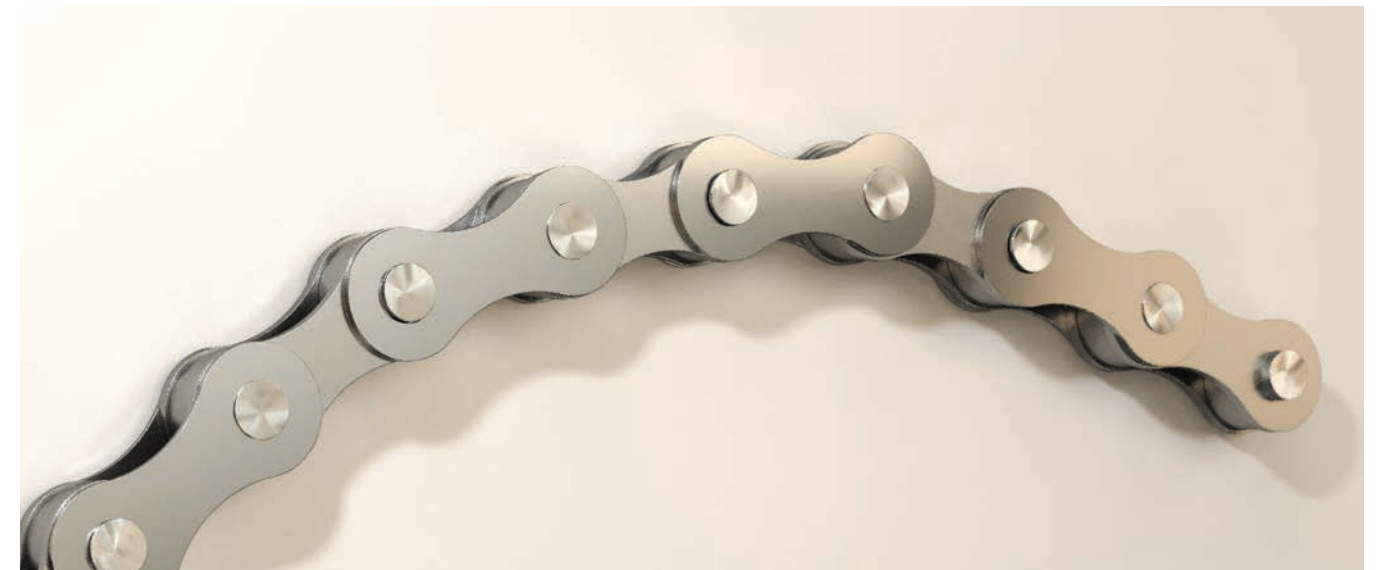

Second only to diamonds in strength, this timeless, scratch-resistant glass can be found in luxury timepieces, and adds weight and presence to our cooktop knobs.

**Figure Eight Drive Chain**

Often found in performance automotive engines, the figure eight drive chain ensures a smooth, single-handed opening on our culinary-inspired French-Door wall oven.

**Precision Engineered Metal**

Used in high-end aviation for its durability and for its ability to strengthen in cold temperatures, this metal creates a fitted, seamless look to our refrigerator door bins and will stay elegant for a lifetime.
