COOK LIKE A GOD

THOR
K I T C H E N®

THOR IS BORN

You're into cooking. (And let's face it, if you weren't, you'd probably be off reading about gardening or fly fishing or something else right now, right?) So maybe you're a budding gastronome or maybe you're a full-blown chef de cuisine in that kitchen of yours. Or maybe you just want to cook for friends or family and don't want to embarrass yourself.

You're right in our wheelhouse. We're THOR Kitchen. And what we design and build are some of the hardest working kitchen mates around.

Professional design. Premium power and performance. Appliances that bring oohs and ahhs before the first dish even hits the table. And the utterly fantastic news? You don't have to decide between a new car or a new kitchen suite to step into them.

Seriously. You can get an entire suite of handsomely designed and meticulously crafted THOR Kitchen appliances for less than the price of someone else's hyped-up, absurdly priced range alone. That full suite of kitchen appliances includes a THOR Kitchen professional stainless steel range, range hood, refrigerator, and stainless steel dishwasher.

All for under \$6,000.

Truly. These are superbly crafted, full-featured, stainless steel tools designed to please both the eyes and the appetites.

That's what THOR Kitchen is all about. You, your kitchen and the ability to have the professional kitchen of your dreams.

A Thor electric range is the central focus, set within a modern kitchen. The range has a stainless steel finish and a black glass cooktop. On the cooktop, there are two stainless steel pots, one with a lid. To the left of the range, a bottle of olive oil and a yellow cloth are on the countertop. To the right, a wooden cutting board and a bowl of onions are visible. The background features a backsplash of dark, textured tiles and a window looking out onto a city street with red brick buildings. The range is flanked by dark wood cabinets with black handles. The Thor logo is visible on the bottom right of the oven door.

ELECTRIC + INDUCTION COOKTOPS

THOR Kitchen's Professional Electric Cooktops offer powerful, precise heat at the touch of a button to slowly simmer sauces or quickly boil large pots of water. Our Induction Cooktops technology combines the temperature responsiveness of a gas cooktop with the fast performance of an electric cooktop. Also, depending on your needs, induction is inherently more energy-efficient and features faster heat-up times. The sleek design complements any kitchen and perfectly balances style, convenience, and power.

REFRIGERATION

Let's keep everything as cool, crisp, cold and/or frozen as the recipes call for, shall we? Answering the call is our freestanding refrigerators. Inside where the magic happens, you'll find two freezer drawers, a full-width chiller drawer and a Triple or Twin Cooling system that separates the refrigerator and freezer zones. Moisture, odor transfer and freezer burn, gone. Compliments on meals, way, way up.
