

So, you've ordered your new appliances! What happens now?

Well, the big questions are "Can we get them in your home?" and "Will they fit?"

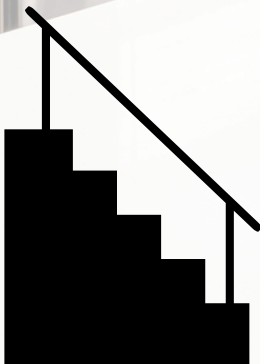

Here's what you need to check:

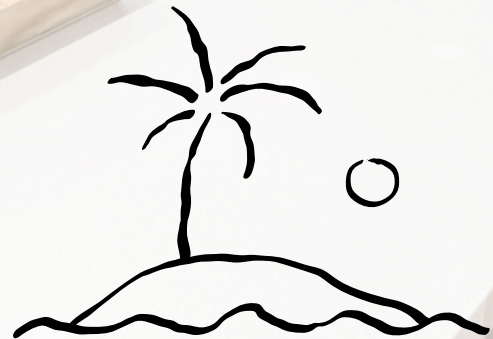

Are your doors at least 30" wide?
If not, can doors be removed?

Will the appliance fit into
the cabinets?

Will it fit down the stairs?
Do the railings need to be
removed? Will it clear the
landing?

Is there enough space
around your kitchen
island? Appliances can't
be lifted over islands
