

Whole House Filtration

Creating better water **for your home.**

When your water is cleaner and more efficient, that means your household is more efficient. Sinks and tubs will have fewer stains. Drinking water will taste and smell better. Plumbing will be less corroded. Household appliances and fixtures will operate more efficiently and last longer.

Your household deserves quality water that's free from stain-causing impurities, foul odors, nuisance particles or just unpleasant taste. That's why WaterCare® is dedicated to making water good for life. As your professional WaterCare dealer, we will analyze your water and configure the precise whole house filtration system for your home.

Ion Pro® **Better for your home, and the environment.**

The secret behind Ion Pro filtration systems is combining a unique air chamber with a specialized filtration media. The air chamber oxidizes dissolved contaminants, and the media effectively filters the problem particles from your water without the use of additional chemicals or salt.

Ion Pro Air Iron filters are the perfect solution to put an end to staining from iron and manganese. In addition to improving the vibrancy of your laundry, you'll preserve the life of your plumbing fixtures and appliances.

Ion Pro Air Sulfur filters eliminate the rotten egg smell caused by high levels of hydrogen sulfide in your water. The media efficiently captures and locks-in the oxidized particles and returns your water to the odor-free quality you expect.

CareClear Pro® **The best water solution for your home.**

CareClear Pro water filters provide a solution to neutralize acidic water, remove chlorine taste and odor, or even remove uncommon nuisance particles from your home's water.

With a variety of media available for these whole house filtration systems, you can rest assured that we have the perfect solution to make your water better for you and your family.

Added protection for your well-being.

When an extra safeguard is needed against nuisance bacteria, an optional chlorine generator is available for all WaterCare filtration systems.

Whole house filtration systems.

The highly efficient solution for high-quality water.

Every component, every feature, every innovation that goes into the WaterCare whole house filtration system has been designed to bring the highest quality, most efficient water to you and your family.

Patented chlorine generator (optional).

- Ability to self-sanitize against nuisance bacteria
- Monitors every cleaning
- Includes low-maintenance brine tank

Innovative air chamber.

- Efficiently oxidizes dissolved contaminants
- No added harsh chemicals or salt
- Patented air release technology
- Only available in the Ion Pro Air Iron and Ion Pro Air Sulfur

Quartz underbedding.

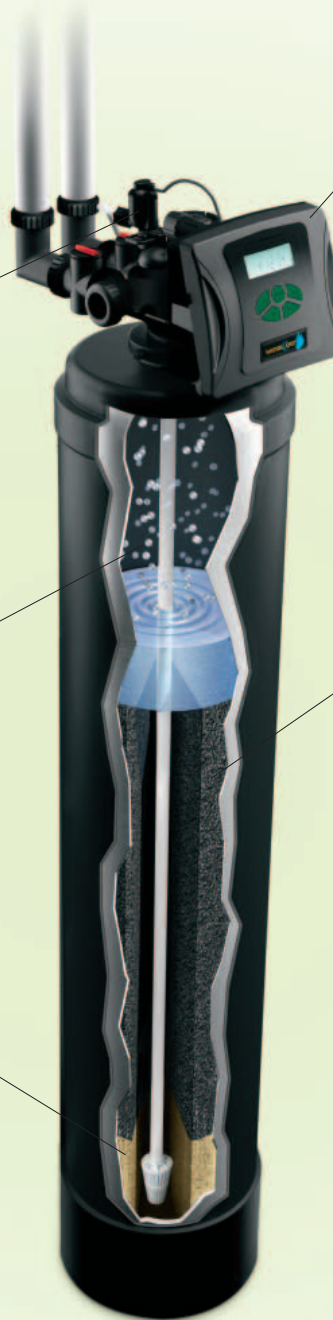

- Provides accurate and efficient cleaning process
- Delivers high and consistent flow patterns

Patented IQ² technology for better water.

- Cleans itself only when necessary
- Vacation Mode
 - convenient, money-saving
- System notifications
- Only one moving part for easy maintenance
- Battery back-up
- Water use is monitored and recorded

Highly effective filtration media.

- Filters for water problems of any kind:
 - iron
 - manganese
 - hydrogen sulfide
 - acidic conditions
 - nuisance particles, and other contaminants
- Rigorous quality control process for testing the media

Water treatment innovations inspired by your lifestyle.

WaterCare® whole house filtration systems are part of the WaterCare water treatment product line, and are built in the USA. WaterCare has been dedicated to making water good for life and developing industry-leading innovations for over 60 years.

As a WaterCare dealer, we are part of a select group of certified dealers who exclusively sell and service WaterCare systems. With WaterCare, you can be assured of the cleanest water for your family, along with the highest level of customer service.

We have proven water treatment industry expertise and received extensive product and service training specific to WaterCare's water treatment systems. Above all, because of the flexibility of the WaterCare systems, we can tailor your water system to best satisfy your family's needs. That's how we make water good for life.
