

Coffee System Maintenance Program

Introduction

Preventative maintenance on your coffee system is essential in maintaining proper functionality. Coffee systems get less efficient when they are dirty. Our comprehensive maintenance check includes essential cleaning accessories, addressing mineral deposits, sticky residue, and ensuring optimal functionality. This maintenance check will include all necessary cleaning accessories.

Pricing

- \$349.00 each unit
- Payment is due in full at the time of scheduling
- Nantucket
 - \$499.95 each unit

**Call To Schedule

Time Expectations

Length of visit could be up to 2 hours

Explanation of program

Service	Purpose
Water Hardness Test Strips	The water hardness test strip measures the level of minerals in the water you will be using in your machine. That's important because harder water, which is water with a higher mineral content, will cause scale to build up faster within your machine.
Descaling Tablets	Descaling tablets will remove mineral deposits from the heating element and water pathways.
Cleaning Tablets	The tablets are cleaners designed to remove the sticky, oily coffee residue that builds up in and on your coffee system.
Milk Pipework Cleaning	Effectively removes milk protein and fats.
Main Dispenser Cleaning	Clean the coffee system to prevent bacterial growth.

Parts Needed?

The technician will give a detailed description and quote any parts and/or labor needed. The pricing comes from the New England Flat Rate Repair Guide. The technician will schedule a service call return trip before leaving the residence.
