

Ice Maker Maintenance Program

Introduction

Preventative maintenance on your ice maker system is essential in maintaining proper functionality. Ice systems become less efficient when they are dirty. Our preventative maintenance check includes a thorough cleaning of the interior, condenser coils, and a water supply inspection. Keep your ice system running efficiently and avoid potential issues. This maintenance check will include all necessary cleaning accessories.

Pricing

- \$399.95 each unit
- Payment is due in full at the time of scheduling
- Nantucket
 - \$499.95 each unit

**Call To Schedule
617-825-9253**

Time Expectations

Length of visit could be up to 90 minutes.

Appliance must be running for at least 48 hours prior to maintenance visit

Explanation of program

Service	Purpose
Clean the Interior	The technician will use a factory approved ice maker safe cleaning solution to clean the interior of the ice maker. Then run the unit through a clean cycle. After cleaning, run the unit through a harvest mode, testing all functions of the unit.
Clean the Condenser Coils	The condenser coils of the ice maker can accumulate dust and debris over time, affecting the efficiency of the unit.
Check the Water Supply	Inspect the water supply line for any signs of leakage or damage.

Parts Needed?

The technician will give a detailed description and quote any parts and/or labor needed. The pricing comes from the New England Flat Rate Repair Guide. The technician will schedule a service call return trip before leaving the residence.
