DISHWASHER

THANK YOU FOR SCHEDULING YOUR DISHWASHER INSTALLATION!

PLEASE ENSURE THE FOLLOWING PRIOR TO DELIVERY:

- ☐ Water shut-off valve location is known & within 16' (max) of Dishwasher.
 - Water line connection must be located under sink. We do not go into crawl spaces if your plumbing runs through the floor.
- ☐ Water shut-off valve is in good working condition and requires no plumbing alterations to connect our parts*
 - We only connect to standard 3/8" male threaded shut-off valves with a store provided Stainless Steel water line.
- ☐ The water drain location is known & in good working condition, and within 12' (max) of Dishwasher.
 - Drain line connection must be located under sink and connected to existing plumbing only. We do not go into crawl spaces if your plumbing runs through the floor.
- ☐ Space provided meets manufacturer's required minimum cabinet dimensions**
- ☐ Electrical panel and dishwasher breaker location is known.
 - Some Dishwashers REQUIRE a plug & cannot be hardwired. Please verify with your sales associate prior to delivery to have proper connections available.
- ☐ If an electrical outlet is used, it is located no farther than 5' & in a location that will not interfere with Dishwasher.
- ☐ If electrical hardwire is used, it is long enough to connect to the unit outside of cabinet.
- ☐ Flooring is not obstructing the front legs of the existing unit.

If any of this above information is unknown or incorrect, please reach out to your sales associate with ample time prior to delivery for assistance.

* Installation CANNOT be completed without correct and functional water shut-off valve. It is recommended to test water valves prior to delivery if possible. Our installers will notify you if the valve is faulty. A licensed plumber must be contacted to fix faulty valve. Water **MUST** be supplied to the home to flush the line and test all connections. If water is not supplied to the home, responsibility falls on the homeowner to check and verify all connections or installation may not take place until water is supplied to home. The delivery can still take place but there's no guarantee that the appliance will be installed. **If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.**

** Our installers DO NOT make any modifications to floors, cabinets, countertops, plumbing, or electrical. Specs for appliance **MUST** be met for full installation completion. Our installers are on a scheduled timed route and cannot wait for alterations to be made. **If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.**
