

ELECTRIC / GAS DRYER

THANK YOU FOR SCHEDULING YOUR DRYER INSTALLATION!

LEASE ENSURE THE FULLOWING PRIOR TO DELIVERT.	
	Ducting must have a 4" round adaptor & be easily accessible & completely free of
	obstructions*
	Space provided meets manufacturer's required minimum cabinet dimensions**

Electric Model Dryers:

- \square A dedicated circuit, appropriate outlet is available and located within 4' 6' of appliance.
 - We only carry 4' or 6' cords. If a longer cord is needed, it is your responsibility to have one prior to delivery.

Outlets will look like this*:

Note the "L" prong.

Gas Model Dryers:

- □ Natural gas or propane shut-off valve MUST be present, a metal connection, and located directly behind appliance***
- □ A dedicated circuit, appropriate outlet is within reach of supplied manufacturer power cord.

If applicable: Verified a liquid propane conversion kit is provided by manufacturer; if not, it must be ordered.

If any of this above information is unknown or incorrect, please reach out to your sales associate with ample time prior to delivery for assistance.

- * We use a UL approved hybrid venting only. If for any reason we cannot use our approved ducting, a Post Acknowledgement Release will need to be signed. We do not clean out obstructed ducting.
- ** Our installers <u>DO NOT</u> make any modifications to floors, cabinets, countertops, plumbing, or electrical. Specs for appliance MUST be met for full installation completion. Our installers are on a scheduled timed route and cannot wait for alterations to be made. If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.
- *** Installation <u>CANNOT</u> be completed without correct and functional gas shut-off valve. Our installers will test existing gas valve for leaks & notify you of any. A licensed plumber must be contacted to fix faulty valve. Gas MUST be supplied to home to test all connections. If gas is not supplied to the home, responsibility falls on the homeowner to check and verify all connections or installation may not take place until gas is supplied to home. The delivery can still take place but there's no guarantee that the appliance will be installed. If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.
