

 **JOHNSON BROTHERS**
APPLIANCES
ELECTRIC / GAS RANGE

THANK YOU FOR SCHEDULING YOUR RANGE INSTALLATION!

PLEASE ENSURE THE FOLLOWING PRIOR TO DELIVERY:

- ☐ Specs have been verified & electrical is in correct location as to not impede Range*

Electric Model Ranges:

- ☐ A dedicated circuit, appropriate outlet is available and located within 4' – 6' of appliance.
 - We only carry 4' or 6' cords. If a longer cord is needed, it is your responsibility to have one prior to delivery.

Outlets will look like this**:

Gas Model Ranges:

- ☐ Specs have been verified & gas shut-off is in correct location as to not impede Range*
- ☐ Natural gas or propane shut-off valve **MUST** be present, a metal connection, and located directly behind appliance***
- ☐ A dedicated circuit, appropriate outlet is located in the correct spec location so as not to impede Range.

If applicable: Verified a liquid propane conversion kit is provided by manufacturer; if not, it must be ordered.

If any of this above information is unknown or incorrect, please reach out to your sales associate with ample time prior to delivery for assistance.

* Our installers DO NOT make any modifications to floors, cabinets, countertops, plumbing, or electrical. Specs for appliance **MUST** be met for full installation completion. Our installers are on a scheduled timed route and cannot wait for alterations to be made. **If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.**

If the connection is hardwired and not up to code, a licensed electrician must be contacted. The delivery can still take place but there's no guarantee that the appliance will be installed. **If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.

*** Installation CANNOT be completed without correct and functional gas shut-off valve. Our installers will test existing gas valves for leaks & notify you of any. A licensed plumber must be contacted to fix faulty valve. Gas **MUST** be supplied to home to test all connections. If gas is not supplied to the home, responsibility falls on the homeowner to check and verify all connections or install may not take place until gas is supplied to home. The delivery can still take place but there's no guarantee that the appliance will be installed. **If rescheduling is needed due to site deficiency, it is not guaranteed to be immediate. An extra trip & labor charge may be applied for each added visit.**
