**What is this program?** An opportunity for a full-time job in a high-demand technical career path - appliance repair. Receive hands-on learning and on-the-job training, including exclusive training from top industry brands.

**Who qualifies?** Are you a recent high school graduate or adult looking to start a new career, but aren't a fan of classroom learning or need to work full time? This program allows you to get your start in this high-demand trade field and learn the skills you need to build a long-term career, all while earning a living wage with access to health insurance and other benefits.

**Where is this located?** Your day will begin at our state-of-the-art Warehouse & Service Center located at 590 O'Malley Drive in Coopersville, with additional training in the field at homes and job sites across West Michigan!

**Why should I apply?** The Bekins Technical Training program allows you to receive the hands-on technical training needed to build a long-term career in the high-demand industry of appliance repair while making \$20 per hour to start. On-the-job learning from trade professionals, and the potential for certifications through industry leaders like SubZero & Wolf, makes the Bekins Technical Training program an excellent alternative if you want a rewarding career in a technical field but want to avoid college or technical school debt. Plus you will have access to the benefits of full-time employment, health insurance, vision insurance, 401k benefits, paid vacation, holidays off, and a consistent work schedule!

**When should I apply?** Why wait? Apply today by visiting [www.bekins.us/technical-training/](http://www.bekins.us/technical-training/)  
Jump right in and earn while you learn!

## Are You Mechanically-Inclined?

Get out of the classroom setting by hitting the road with our Appliance Repair Technicians and start your rewarding career by learning a variety of skills:

- Learn to read and understand the schematics of wiring diagrams in technical sheets for a variety of appliances and brands
- Mechanical skills - Understand how a motor's mechanical parts interact with appliances and electronics
- Basic understanding of electricity including amperage, voltage, control boards, tracing electricity and how it relates to an entire home
- Basic understanding of plumbing, how it works in the home, how it attaches to appliances and how water works within various appliances
- Basic understanding of gas, the difference between natural gas and propane along with how it is converted for certain appliances
- Basic carpentry skills, including the proper use of hand tools and welding equipment

In addition, you will spend most of your day out of the office visiting a variety of homes and meeting new people. Our employees develop relationships with various homeowners, contractors and other skilled workers across West Michigan.

Sound like a good fit? Visit our website, [www.bekins.us/technical-training/](http://www.bekins.us/technical-training/) to apply today!
